

## NEWS RELEASE

### **ROBIX MARKETING C SERIES CLEAN OCEAN VESSELS IN CALGARY AND ATLANTIC CANADA - Exhibiting at the Atlantic Canada Petroleum Show and the Global Petroleum Show 2015-**

**June 5, 2015 – Lethbridge, AB: Robix Alternative Fuels, Inc. (“Robix” or the “Company”) (RZX:CSE, ROX:Frankfurt)** announced today that it will be exhibiting at the upcoming Global Petroleum Show 2015 held in Calgary, Alberta at the Stampede Park in the Health and Safety Zone booth #4407 on June 9 to 11, 2015. In addition, Robix will be exhibiting at the Atlantic Canada Petroleum Show to be held in St. John’s, Newfoundland at the Delta St. John’s Hotel and Conference Centre booth #1506 on June 15 to 18, 2015.

Robix recently unveiled its patented C160 vessel, a catamaran style vessel capable of recovering up to 160 m<sup>3</sup>/hr of spilt petroleum off the surface of the ocean. The C Series product line are scalable recovery vessels by design. The small end, the C10, can recover up to 10 m<sup>3</sup>/hr while the C20, C40 and C80 increase proportionally to the medium sized C160. Larger sizes are available on request. The C Series is capable of efficiently and effectively recovering oil in rough and debris laden sea conditions due to its rugged design and stable platform. Where other conventional mechanical oil recovery systems quite often fail in anything more than calm waters, the C Series can operate in waves up to 8 feet, depending on the size of the vessel. The recovery rate of the Robix C Series is in the 90-97% range which is significantly higher than traditional recovery rates recorded by industry over the past two decades.

“With the C160 vessel built and ready to deploy we are keen to meet with customers,” commented Nathan Hansen, President and CEO of Robix. “Calgary and Atlantic Canada are two very important markets for us. Customers from around the world will be at the Global Petroleum Show and this is a perfect venue for our C Series product line. Likewise the Atlantic Canada Petroleum Show will primarily be attended by offshore production companies which are a main target for the C160. I will be joined by my sales team at both shows and we are excited to engage customers with our compelling product line.”

#### **About Robix Alternative Fuels**

The Corporation is an "industrial products/technology" company, which has developed an oil spill recovery vessel with the capability to recover oil not only in rough and debris laden sea conditions but also in more contained environments such as lakes, rivers and tailings ponds. Robix has recognized a worldwide market opportunity for effective containment, recovery and disposal equipment, particularly in the oil spill protection industry. The business model is focused on Robix becoming a large-scale provider of services and/or equipment under licensing arrangements with other industry participants, wherein Robix will use its patented design solution.
