ROBIX LAUNCHES P SERIES OIL RECOVERY PRODUCT LINE TARGETING OIL PRODUCTION SETTLING PONDS

September 2, 2015 – Lethbridge, AB: Robix Alternative Fuels, Inc. (“Robix” or the “Company”) (RZX:CSE, ROX:Frankfurt) announced today that it has launched its P Series oil recovery platform concept, which is designed to address the oil-production settling pond market. The P Series leverages the proprietary drum technology first commercialized in the Company’s C Series product line.

Unlike the C Series, which is an oil spill recovery vessel used in open rough waters to recover split oil, the P Series is a stationary platform that is ideally suited to settling pond applications. The P Series uses patented drum technology to siphon oil from the surface of the ponds within oil production facilities. The recovered oil is recirculated within the customer’s facility. The Company’s first model is the P140, which has an oil recovery rate of 140 m³/hr. Like the C Series, the P Series is also scalable technology that can scale up or down depending on customer requirements. Robix is currently in discussions with major oil companies in North America on the P Series products.

“Our discussions with customers led us to create the P Series,” commented Nathan Hansen President and CEO of Robix. “We were able to quickly apply the C Series technology and design principals to create a new product that can cost effectively recover oil and give it back to the customer, effectively improving their bottom line while reducing impact on the local environment. It’s a win-win for our customers, especially at a time when oil producers are motivated to find additional efficiencies due to depressed oil prices.”

About Robix Alternative Fuels

The Corporation is an "industrial products/technology" company, which has developed an oil spill recovery vessel with the capability to recover oil not only in rough and debris laden sea conditions but also in more contained environments such as lakes, rivers and tailings ponds. Robix has recognized a worldwide market opportunity for effective containment, recovery and disposal equipment, particularly in the oil spill protection industry. The business model is focused on Robix becoming a large-scale provider of services and/or equipment under licensing arrangements with other industry participants, wherein Robix will use its patented design solution.
